## Profile

As a front-end developer, I turn ideas into powerful, user-friendly web applications. With expertise in cybersecurity, I integrate strong security protocols, perform detailed vulnerability and penetration testing, and deliver trustworthy systems. I also design Python-based GUIs for data analysis, bridging functionality with intelligence to help businesses make smarter decisions. Adept at problem-solving, collaborating in agile teams, and delivering responsive, user-focused digital products. Recognized for adaptability, leadership, and the ability to bridge technical solutions with business needs.

## Skills / Areas of Strength

Web Development, Penetration Testing, Vulnerability Assessment, Version Control & Deployment, Problem-solving, Teamwork, Leadership, Adaptability, API Integration, Python Development, CMS Management, Data Analysis.

## Professional Experience

### Frontend Developer - Startup Collaboration/Freelance

*Uncut AI | Nov 2024 – Present*

- Developed and optimized frontend architecture using React.js, TypeScript, and Tailwind CSS.
- Implemented media upload and management features with drag-and-drop, previews, and Video.js **Frontend Developer** integration.
- Integrated APIs for video processing and AI-powered editing tools.
- Built reusable UI components and added animations with Framer Motion.
- Conducted cross-browser testing and collaborated in Agile using Git/GitHub.

### Web Developer – Elite Ayomide Solutions

*Jan 2025 – Present*

- Designed and developed a dual-function company website serving as both an awareness platform and an educational hub.
- Built the corporate site to showcase company investment options and highlight support for scaling small businesses.

- Developed an integrated e-learning platform for cryptocurrency education, enabling user account creation, course enrollment, and access to both free and paid classes.
- Implemented responsive design using React.js and Tailwind CSS to ensure seamless access across devices.
- Optimized user flows for course registration and learning management, improving overall user experience.
- Collaborated with stakeholders to align the platform's functionality with business and educational goals.

### **Python Developer & Data Analyst – Newland Polytechnic**

*Nov 2023 – Dec 2023*

- Designed and built a Python Tkinter-based inventory management system.
- Integrated SQLite database for real-time product and sales data.
- Enhanced sales workflows with invoicing, discounts, and stock updates.
- Trained staff to use the system effectively.

### **Full-stack Developer Intern – FemTech IT**

*Oct 2023 – Sept 2024*

- Built e-commerce website with product catalog, user authentication, shopping cart, and checkout.
- Designed MySQL database schema and backend with PHP/SQL.
- Developed responsive UI with HTML, CSS, and JavaScript.
- Enhanced interactivity with product filtering, sliders, and form validation.

### **Cybersecurity Intern – FemTech IT**

*Aug 2022 – Jan 2023*

- Conducted penetration testing and ethical hacking to identify vulnerabilities.
- Performed vulnerability assessments using industry-standard tools.
- Analyzed and secured network traffic through probing and assessments.
- Documented findings and created actionable remediation reports.

### **SIWES Intern – Lufasi Nature Park**

*Mar 2024 – May 2024*

- Planted and managed farm operations as part of agricultural extension training.
- Contributed to sustainability initiatives and eco-based projects.

## **Education**

Bachelor's Degree – Agricultural Science

University of Ilorin, Kwara State, Nigeria.

Relevant Coursework: Agricultural Systems, Farm Management, Agricultural Communication

## **Certifications**

Web Development (Fullstack) – FemTech IT, 2023

Cybersecurity – FemTech IT, 2022

Python (GUI Programming) – Interface ICT, 2020

Web Designing – Interface ICT, 2020
